

Uploading your game to the GameJam!

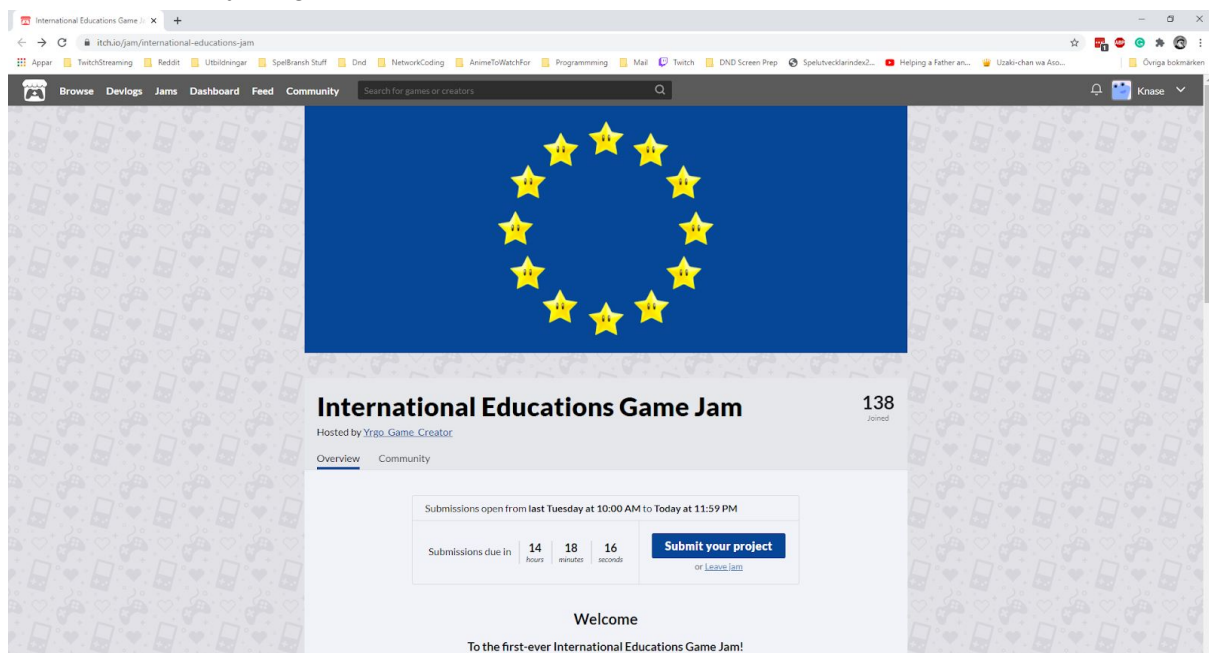

Step 1: Join the GameJam!

This is done by going to <https://itch.io/jam/international-educations-jam>! There you will find a button to **Join Jam** ! If you have not already joined then now is the time!

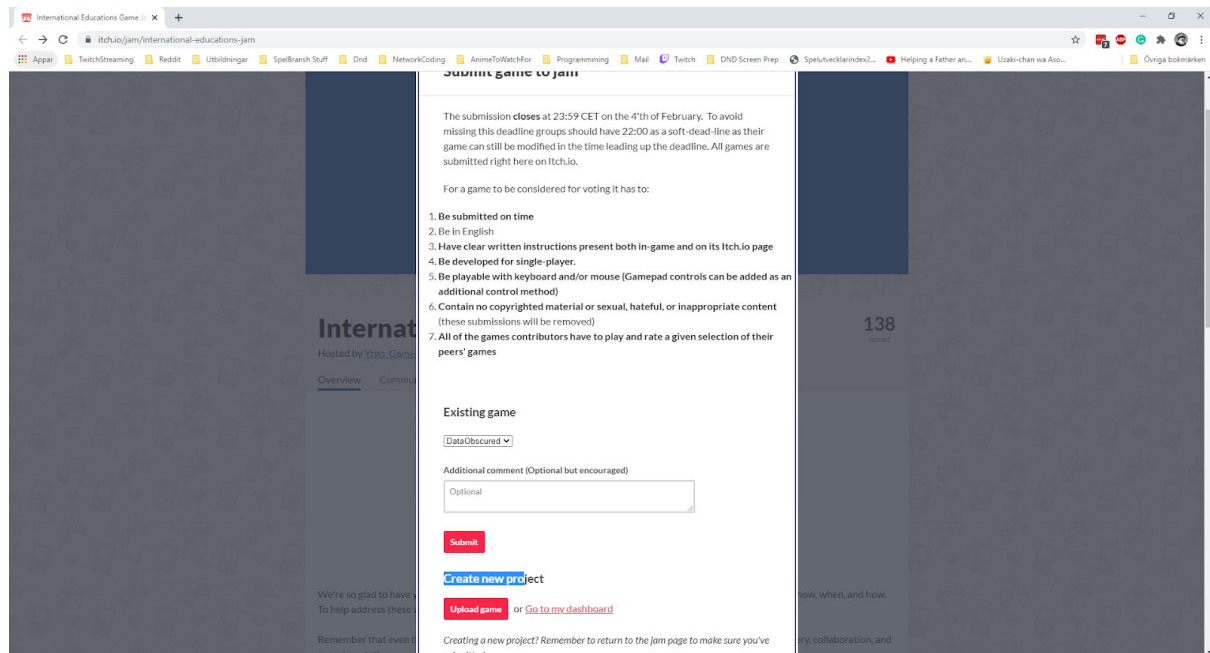

Step 2. Upload your game!

After joining the button should now say **Submit your project**! Click that button and you are prompted to add your game!

There you will have at the bottom a section called **Create new project** and a button called **Upload game!** If you already made a page for your game you can add it in by using the **Existing game** section!

Step 3: Creating your page for the game!

After pressing the **Create new project** you will now create your page! Here are some things you need to set on your page!

- **Title** of your Game
- Write some information about the game.
- Pricing set to **No payments**
- **Upload a zip file of your games build!**

These are some things you need set for the submission to be valid!

Now after you have pressed the **Save & view page** you now need to make the page public!

This is done by pressing the **Draft** or **Edit Game** button, which is located at the top of the page! When pressed you will be navigated to your projects settings and you need to set your **Visibility & access to public!**

Step 4: Add your teammates to the project

You also need your teammates to have access to the project! This is done by going to your pages settings. Top of the site, button **Edit game**. Then you need to navigate to **More** and then select **Admins**. In there you add in your teammates **Itch.io username** and press **Add Admin**. Now they will also be able to edit the page!

After that you should create a section in your games description. Located at **Edit Game** under **Details**. Where you will write in your names and group number! For example:

Credits Team 00:

- Jesper Uddefors - Programming
- Max Friberg - Art

Step 5: You are done!

Now you have submitted your game and have the time to improve your Itch.io page!

Add some instructions, a summary of your game and credits so everyone knows how to play your game and who created it!
